

## JAKE DYSON ↖

The Motorlight Floor is the world's first variable angle uplight and realises Jake Dyson's vision of a versatile and striking light. It allows the user to adjust the beam angle between 8 and 60 degrees, from a tight spotlight to a wide flood of light. As the aluminium wheel at the front of the luminaire rotates, the outer reflector raises and lowers, thus decreasing and increasing the width of the beam. The angle can be fixed or set to continually move through the varying angles creating cyclical waves of light that spread throughout the room.

## VERTIGO BIRD ↘

Vertigo Bird's Smoke collection is a series of floor lights based on 'scaled' elements of suburbia - factory, car, parking lot and house. Isolated from their 'natural' context and transformed into additions for our home or office, their belching 'smoke' lighting our spaces. The floor lamps are useful and critical simultaneously, lighting up our living and working environments and commenting on our everyday lives, surrounded by pollution and consumption.

## MONDANO DESIGNS ↘

Mondano Designs is a new Spanish furniture manufacturer, but has many years of experience behind it as their team boasts top Spanish designers Miguel Mila, Gabriel Teixido and Jonathan Daifuku to name only three. Pictured is the Dins chair by Pascual Salvador, belonging to a new collection of restaurant and hotel furniture. It is available with or without arm rests and in a one and two-seat version and is suitable for reception, hotel room or domestic use.

## WOLFSON DESIGN ↖

The Split stool from the Twisted series by Philip Michael Wolfson, is manufactured in England by Solidity, from LG High-Macs solid acrylic. The stool appears to be frozen in a curving fluid form, giving the design continuous transformation when viewed from different angles. This is the first British showing of new works by the international studio.

## QUARTIER ↗

Birdcage is a classic indoor doghouse for smaller dogs, with a filigree structure that encourages the pet to be social. The clear form of the doghouse is accentuated by its materials and brilliant colour. In contrast to the shining surface of the chrome frame, the felt strings of the roof have a reflection free surface that are individually adjustable. All covers are removable and washable.
